

2022-23 Fall MTRSD Data Report

November 2022

Superintendent's Student Learning Goal

Data Driven Instruction

- Establish District-wide Data Warehouse
 - By December 2022, under my direction the district will develop a data warehouse that includes multiple data markers, including MCAS, from Kindergarten through grade 12
 - By June 2023, under my direction the district will create a system of regular data analysis that aligns professional development, classroom instruction, and data meetings that focus on increasing student achievement in math and literacy
- 

Context

Our goal is consistent reporting on similar data sets year-to-year

Twice-yearly report on district-level academic achievement and progress

Trends and Areas of Focus

Data sets are limited, but useful:

- Unfinished instruction
 - Fluctuating cohorts
 - Changes in assessments
 - New systems
 - Different reporting systems
-

What Data is Included?

K-8 - universal screening tools and diagnostics

3-10 MCAS

HS - AP, SAT, Secondary and post-secondary outcomes

First look at some parts of the data dashboard

Literacy Data

Current Data Sets:

- DIBELS K-8 - universal screening given 3 times per year, predictive of literacy outcomes (subtests measure different skills)
- MCAS Scaled Scores
- MCAS SGP

Uses:

- To identify curricular gaps and areas of instructional focus
- To identify students in need of intervention
- To group students for differentiated and tiered instruction
- To monitor progress over time

Blue - exceeding expectations

Green - meeting expectation

Yellow - partially meeting expectations

Red - not meeting expectations

Student Growth by school

Math Data

Current Data Sets:

- AVMR-Based Screener K-6 given 3 times/year
- GLOSS screener - 7-8 two times per year

Both screeners identify foundational skills for grade-level math

- MCAS Scaled Scores
- MCAS SGP

Blue - exceeding expectations

Green - meeting expectation

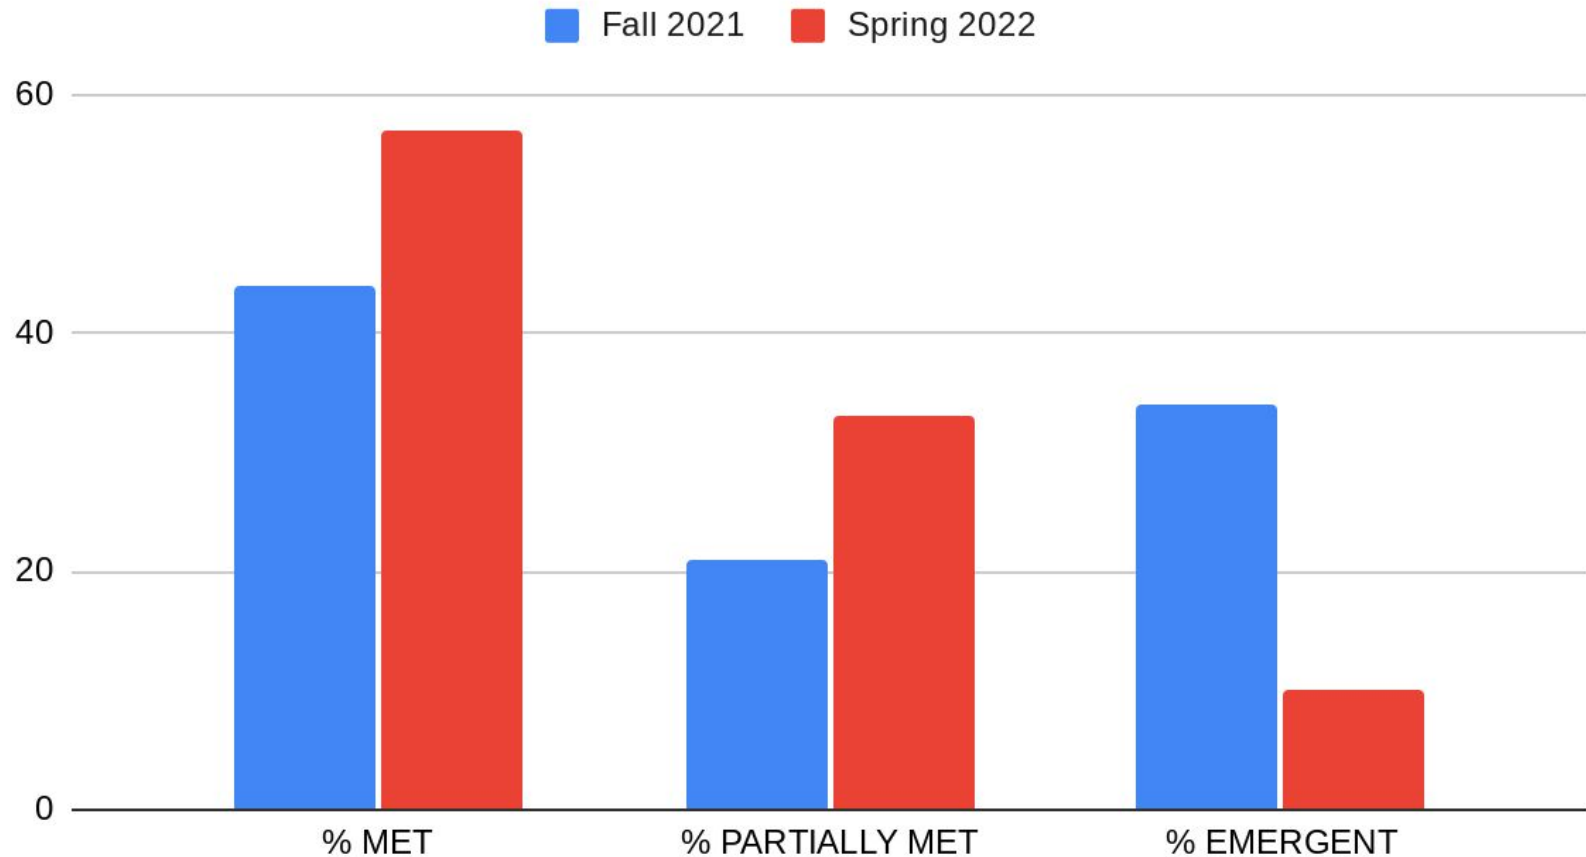

Uses:

- To identify curricular gaps and areas of instructional focus
- To identify students in need of intervention
- To group students for differentiated and tiered instruction
- To monitor progress over time

Yellow - partially meeting expectations

Red - not meeting expectations

K-6 MTRSD Math Screeners: Fall 2021 & Spring 2022

Fall K-6 AVMR-Based Screener by Grade (top) and Aggregate (bottom)

GloSS

- All 7th and 8th graders were assessed using the GloSS - 1:1 interview to their individual learning profile of numeracy development
- This is a new assessment for the district that continues the approach to assessment used in the AVMR-based screeners for grades K-6.
- They were assessed in the domains of Addition/Subtraction, Multiplication/Division, and Proportions and Ratios
- WIN Time will be used to provide interventions in these domain areas throughout the school year, beginning with addition/subtraction

Science Data

MCAS Data

- 5th grade STE - addresses grades 3-5 science standards
- 8th STE - addresses grades 6-8 science standards
- 10th STE - addresses HS Biology Standards

Data Uses:

- Curricular review
- Course-based assessments used to monitor student progress in curriculum
- Currently we do not have a district science assessment system
